Summary — Electronics and Computer Engineering student at VIT Chennai with hands-on experience in machine learning, deep learning, NLP, computer vision, and generative AI. Experienced in developing end-to-end ML solutions involving data preprocessing, feature extraction, model development, evaluation, and deployment. Strong foundation in Python and applied AI, with experience building intelligent systems for real-world problems.

Education

VIT University, Chennai, Tamil Nadu <i>B. Tech - Electronics and Computer Engineering</i> CGPA: 8.71	2023 - 2027
Woodrow Senior Secondary School, Bareilly, UP <i>XII - PCM (87.8%)</i>	2021-2022
GRM Senior Secondary School, Bareilly, UP <i>X (97.4%)</i>	2019-2020

Skills

- **Programming and Data:** Python, Java, JavaScript, SQL, Pandas, NumPy, Matplotlib
- **Machine Learning:** TensorFlow/Keras, OpenCV, YOLOv8, MobileNetV2, CNN
- **NLP and Generative AI:** NLP, TF-IDF, Sentence Transformers, FAISS, RAG
- **Tools and Platforms:** Streamlit, Git, GitHub, Google Cloud, Flask, Vercel, Render
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Deep Learning, Natural Language Processing,

Projects

- **DocLit AI – Intelligent Document Assistant (RAG) 🌀:**
Tech: React, Sentence Transformers, FAISS, Google Gemini API
- Developed a full-stack RAG application enabling users to upload PDFs and query documents using natural language.
- Built a semantic retrieval pipeline using Sentence Transformers and FAISS, integrating retrieved context with the Google Gemini API to generate responses.
- Designed a responsive React interface with drag-and-drop uploads, conversational chat, Markdown rendering, and source-aware document retrieval.
- **Medical Transcription Classification using NLP 🌀:**
Tech: Python, TF-IDF, Logistic Regression, NLP, t-SNE
- Developed a 4-stage NLP pipeline for clinical text preprocessing, entity extraction, negation detection, and specialty classification using TF-IDF and Logistic Regression.
- Achieved 77.3% accuracy on 1,200+ medical transcriptions across four specialties and visualized feature separation using t-SNE.
- **Smart Surveillance Monitoring System 🌀:**
Tech: React, Node.js, Express.js, MongoDB, Flask, YOLOv8, JWT, Vercel, Render
- Built a full-stack surveillance dashboard featuring live camera monitoring, YOLOv8-based object detection, incident management, and analytics.
- Developed the application using React, Node.js, and MongoDB with JWT authentication, image uploads, and severity-based incident classification.
- Integrated YOLOv8 through a Flask microservice and deployed the platform using Vercel and Render.

Certifications 🌀

- | | |
|--|--------------|
| – Deloitte Australia - Technology Job Simulation 🌀 | Forage |
| – Develop GenAI Apps with Gemini and Streamlit Skill Badge 🌀 | Google Cloud |
| – Prompt Design in Vertex AI Skill Badge 🌀 | Google Cloud |
| – AI course in collaboration with Google for Developers 🌀 | SmartBridge |

Achievements and Extracurriculars

- **National Semi-Finalist of Flipkart GRiD 7.0 🌀**
- **Sangam Club** — *General Secretary* : Led cultural initiatives, coordinated events, and managed club operations with cross-team collaboration.
- **CodeChef-VIT Student Chapter** — *Marketing and Sponsorship* : Coordinated sponsorship outreach efforts.
